### **AVERAGE RESPONSE TIME FOR PRIORITY 1 CALLS**

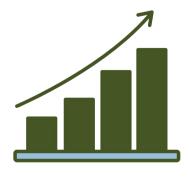

Due to the shortage of resources and the goal of achieving effective workflow, calls are prioritized based on circumstances that a reporting party provides a call taker at the dispatch center.

**Response time** is defined as the time interval between when a call is dispatched to a Deputy-Sheriff and when the Deputy-Sheriff arrives at the scene.

**Priority 1 call** is defined as the highest priority in which an event is in progress or just occurred and there is an immediate threat to life or great bodily harm (e.g., active shooting, burglary in progress, etc.)

Average response time for priority 1 calls has increased in the unincorporated area and contract cities (i.e., Hughson, Patterson, Riverbank, and Waterford).

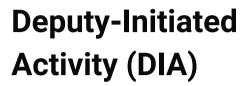

26%

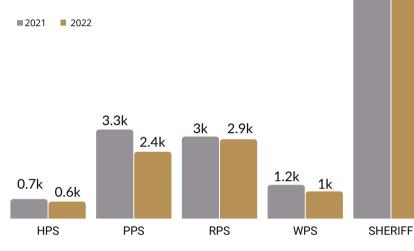

Compared to 2021, the average response time in 2022 increased by 26% in the unincorporated area.

The program provides crime statistics since 1930. Stanislaus County complied with the program, and all reported crimes are indexed accordingly.

The table below shows the yearly totals of the UCR Part 1 crime index. Compared to 2021, the total number of UCR Part 1 crimes increased in 2022. 16% The overall total of reported UCR Crimes in 2022 from 2021 increased by 16%.

## **USE OF FORCE**

The Stanislaus County Sheriffs Office requires a Use of Force report on all incidents when force is used. Not all use of force incidents result in injuries. Use of force includes a physical control hold, restraint device, take down, and/or the use of a weapon. A supervisor reviews all use of force reports to ensure the use was appropriate and within the guidelines of the Sheriff's Office policy and the law (visit Policy, Training, & Legislative Affairs of the Stanislaus County Sheriff's Office). If a deputy misused force, an internal affairs investigation is conducted. The deputy could receive training, discipline, or termination. A separate criminal investigation could be initiated, leading to prosecution if it is determined that a violation of law/civil rights occurred.

 In 2022, there were 233 incidents in which force was used. These incidents were reported from the Operations Division.

The Stanislaus County Regional Training Center implemented multiple de-escalation and decision-making trainings. This includes stress inoculation scenario training and the use of the Force Option Simulator. During stress inoculation training, participants are presented with multiple split-second scenarios to improve their decision-making skills. The Force Option Simulator is used to put participants in real-life incidents and educate them better in de-escalation skills and the decision-making process. The aim is to give participants the skills that help them understand decisions, define problems, evaluate options and make the best choices.

"There's a moment when you have to make a splitsecond decision that will form you for the rest of your life."

Dash Mihk

"Sir, Are you okay?"

"What can I do to help you?"

"I am here to help you, not to hurt"
